Memory: 8 GB RAM

Graphics: NVIDIA GeForce GTX 670 / AMD Radeon HD 7970

DirectX: Version 11

Storage: 5 GB available space

English

The graphics are amazing, although as stated in previous reviews, it's too damn dark. I'm sure a lot of people would enjoy actually seeing their cars or the surroundings\/obstacles on your way through the streets. If they can't make the night time brighter (obviously they can, question is, do they want to), it should have an option for changing the brightness or an option for two different times, day and night.
Graphics are amazing, yes, but the developers should really look into optimizing the game more, otherwise most people can't really run it properly.
Also in my opinion, the game has a lot of potential although it would need more variety, like more cars and so on, but optimizing the game should be the first thing to work on.
Aswell as graphics being good on high settings or ultra settings, playing the game on lowest settings is impossible. If you can't handle really great graphics like these, don't bother buying the game before they optimize it.. i dont think this game is worth $5.
